EDUCATION

University of Waterloo

Bachelor of Applied Sciences in Honours Systems Design Engineering with Co-op

Waterloo, ON

Sept 2024 - April 2029

SKILLS

Programming: Python, JavaScript, TypeScript, Java, C++, C, HTML/CSS, SQL, Bash/Shell Scripting

Frameworks & Libraries: Angular, React, React Native, Node.js, Express.js, Flask, Electron

Tools & Platforms: Git/GitHub, Jira, Confluence, Docker, Nginx, Figma, CAD (AutoCAD, SolidWorks)

Technical: REST APIs, CI/CD Pipelines, Database Optimization, Agile/Scrum, Security Testing (ZAP), Data Analysis

Languages: English, French, Kannada;

Interests: Photography, Pilates, Badminton, Tennis, Traveling, Fashion, Vintage Shopping

EXPERIENCE

Operations & Product Intern

Oct 2025 – Present

Early-Stage Startup (Networking & CRM Platform)

Toronto, ON

- Designed **product landing page** and **go-to-market plan** by creating Figma mockups, crafting value propositions, and defining customer segments, establishing pre-launch positioning and user acquisition strategy for B2B SaaS platform.
- Spearheaded **MVP scope definition** and **product roadmap** through **stakeholder alignment sessions** and **competitive analysis** of 10+ CRM platforms, prioritizing core features that reduced scope ambiguity by **40%** for development sprint planning.
- Conducted **15+ customer discovery interviews** and market research by surveying potential users and evaluating pain points, developing 3 core personas that informed product requirements and accelerated feature prioritization decisions.

Software Engineering Intern

Sept 2025 – Present

SS&C Technologies

Toronto, ON

- Conducted **security testing** and **vulnerability assessments** by configuring ZAP scans and building automated pipelines with GitHub Actions, identifying **25+ critical vulnerabilities** pre-production for platform serving **100+ financial institutions**.
- Developed **modular frontend components** by building reusable Angular/TypeScript UI elements and implementing CI/CD workflows with Docker, reducing QA cycle time by **40%** and accelerating feature deployment across **cross-functional teams**.
- Owned **end-to-end feature delivery** by gathering requirements, designing technical solutions, and partnering with product managers in Agile sprints, successfully shipping 5+ features balancing technical constraints with business priorities.

Rail Systems Engineering Intern

Jan 2025 – Apr 2025

Hatch

Mississauga, ON

- Automated **project workflows** by developing Excel VBA macros for milestone tracking and status reporting, reducing manual reporting time by **60%** and improving **cross-functional coordination** across 5+ engineering teams.
- Deployed **EVE-NG virtual IoT lab** by partnering with telecom and cybersecurity teams to configure network simulations and security protocols, enabling proactive threat detection and reducing physical testing costs by **30%**.
- Engineered **C++ train simulation algorithm** using OOP to model route conflicts while reviewing signalling diagrams, reducing manual testing cycles by **50%** and accelerating validation timelines for client deliverables.

PROJECTS

ChildClickCare (EHR Healthcare Analytics Platform)

Nov 2025

Women In Eng x Point Click Care Hackathon | **Tech Stack:** React, Express.js, Firebase, Python

- Developed **full-stack analytics platform** by implementing Python pattern recognition algorithms, building React dashboards with Chart.js, and creating Express.js APIs, enabling parents to track health trends and symptom correlations in children's medical data.
- Designed **Firebase database and authentication** using NoSQL best practices and Firebase Auth for secure user management, achieving **sub-100ms query times** while translating complex health metrics into **actionable insights**. github.com/childclickcare

ELDA (Elderly Learning Digital Agent)

Oct 2025

Hack the Valley X | **Tech Stack:** Python (Flask), JavaScript, OpenAI Whisper, Google Gemini, Electron

- Built **voice-controlled assistant** by learning Electron and implementing Flask backend, OpenAI Whisper for speech recognition, and Gemini API for NLP within **36-hour timeframe**, achieving **95% transcription accuracy** for elderly users with varying speech patterns.
- Conducted **usability testing** with 7 seniors (60-80) by designing test protocols and evaluating qualitative/quantitative feedback to iterate on UX, reducing learning curve by **40%** and improving task completion rates. github.com/elda

LEADERSHIP & ACTIVITIES

Marketing Coordinator

Sept 2024 – Present

University of Waterloo Indian Students Association

Waterloo, ON

- Led **marketing strategy** and **stakeholder management** by creating content calendars, designing graphics in Canva, and managing campaigns across Instagram, Facebook, and LinkedIn, driving **35%** engagement increase, **50%** reach growth through data-driven optimization, and event attendance to **1000+ students**.
- Spearheaded **10+ cultural events** by conducting social media trend analysis, evaluating audience preferences through surveys, and coordinating with **cross-functional teams** of 15+ members, achieving **90%+ attendance capacity** and strengthening campus community engagement.
